Foundations: The Science Behind Leadership & Management

Learn the science behind leadership and management (and how to avoid fads) in this unique program. Work with a group of 8 to 12 peers over 14 weeks and identify approaches that work best for you. Meet peers from across the business and academic community and expand your professional network.

Through weekly readings and discussions, learn about issues at the intersection of employee well-being and organizational needs, and how you can contribute to your organization’s ability to attract, retain and develop talent.

Session 1:
Location: UW-Madison Memorial Library, Room 460, 728 State Street, Madison WI 53706
Dates: Tuesdays, Jan. 25—May 3 (no class Mar. 15) 7:30 AM—9:00 AM
Facilitator: Katherine Sanders, Ph.D., UW-Madison

Registration Fee: UW-Madison Faculty/Staff registration fees paid by UW-Madison
BioForward Members $350, non-members $900

What past participants are saying:

♦ “Thought provoking conversations that help you understand your organization, employees and yourself.” - Executive, Biotechnology Company

♦ “I learned how to reevaluate the type of environment employees need to be successful. There’s more to it than goal setting and tracking success... “ - Director, Biotechnology Company

♦ “Great chance for peer learning about productive management concepts with people in similar situations in diverse professional settings.” - Senior Academic Staff, UW-Madison

♦ “It’s a program that will challenge your views and perception on how an organization should function.” - Director, Biotechnology Company

♦ “The readings are immensely insightful too. I’d never have come across this material on my own.” - Program Director, UW-Madison
